ART AND CULTURE

In the cradle of Impressionism and numerous other artistic movements, Normandy offers an inspiring setting.

With its iconic landscapes that have captivated the greatest artists, this region provides an environment conducive to creative exploration and artistic flourishing.

Our English-language programs offer you the opportunity to explore the richness of artistic creation, cinema, music, literature, and much more, all while benefiting from the expertise and infrastructure of our Norman partners.

Immerse yourself in a dynamic environment where innovation and tradition intersect, allowing you to develop your creativity while discovering the region's unique cultural heritage.

3 years

Up to €14,210

180 ECTS credits minimum

ADMISSION

- Marks obtained on the French Baccalaureate exams or foreign equivalent
- Academic record and marks obtained over the last three years of secondary school
- Interview
- Essays

INFORMATIONS

Through this english-language programme, students are introduced to the history, economies, societies and philosophical and artistic approaches of the various countries of Asia and the Pacific, from India to Japan and from China to Australia.

The issues addressed (political violence, growth and sustainable development, influence of Confucianism, etc.) allow students to familiarise themselves with Asia, a continent with a multi-millennial history and the economic hub of the future, through the lens of the social sciences and humanities, and in comparison with Europe.

Traduction en français

En suivant ce cursus anglophone, les étudiants bénéficient d'une introduction à l'histoire, aux économies, aux sociétés et aux approches philosophiques et artistiques des différents pays d'Asie et du Pacifique, de l'Inde au Japon, de la Chine à l'Australie. Les problématiques abordées (violence politique, croissance et développement durable, entre autres) permettent aux étudiants de se familiariser avec un continent asiatique, riche d'une histoire plurimillénaire et pôle économique contemporain, par le prisme des sciences sociales et des humanités.

MSc Cultural and Creative Industries

Neoma Business School

INFORMATIONS

The MSc Cultural & Creative Industries provides students with deep theoretical and empirical knowledge of the creative and cultural sector.

Covering every branch of the cultural sector, from music and cinema to literature and the visual and performing arts, this Master of Science provides an in-depth view of not only the management of the arts but also the economic, social and cultural issues raised by the current transformation in these industries.

Traduction en français

Le MSc Cultural & Creative Industries aborde chaque branche du secteur culturel : musique, cinéma, livres, arts visuels et spectacle vivant. Il prépare les étudiants à des carrières dans les industries de la culture et de la création. Les cours s'appuient à la fois sur des fondements universitaires et professionnels.

Le programme est non seulement axé sur la gestion des arts, mais il aborde également les problématiques économiques, sociales et culturelles engendrées par la transformation actuelle de ces secteurs.

OPPORTUNITIES

- Cinema and TV production
- Sales manager in the cultural industries
- Marketing and communication manager in the cultural industries

MSc Business Analytics

Neoma Business School

INFORMATIONS

In today's world, everything is driven by data. Firms hold more information about their business environments than ever before. Increasingly, these organisations are recognising the role of data in gaining insights and out-thinking competitors. Across industries and sectors, firms are in dire need of analytics professionals to interpret this data and to drive business transformation and growth.

The MSc Business Analytics is a hands-on programme that prepares students for careers using data-driven and evidencebased decision making. Taught by leading practitioners and world-class faculty, students will learn how to apply the latest academic thinking and analytical and computing tools to help make business decisions.

Traduction en français

Dans le monde d'aujourd'hui, tout est basé sur les données. Les sociétés détiennent plus que jamais des informations sur leur environnement commercial. Et de plus en plus, elles reconnaissent l'intérêt des données pour mieux comprendre le marché et distancer les concurrents. Dans tous les secteurs économiques, les entreprises ont un besoin urgent de professionnels de l'analytique pour interpréter ces données, et favoriser la transformation et la croissance économique.

Le MSc Business Analytics est un programme pratique qui fait écho aux tendances actuelles en matière de données pour former la prochaine vague de professionnels experts en la matière.

INFORMATIONS

The rapid growth and adoption of Artificial Intelligence (AI) technologies have transformed industries and generated significant economic value. However, many businesses struggle to adopt AI effectively, as they lack the right talent to integrate AI within their business strategies and processes. This talent gap has created a demand for professionals who can bridge the gap between AI technology and business applications.

The MSc Artificial Intelligence for Business is designed to train professionals who can create, manage and implement AI solutions within organisations. This programme will equip graduates with the necessary skills to become leaders in the AI industry and create a competitive advantage for their organisations by offering a specialised curriculum that combines AI technology, business management, and practical applications.

■ Traduction en français

La forte croissance et l'adoption généralisée des technologies d'Intelligence Artificielle (IA) ont transformé le monde de l'entreprise et généré une valeur économique considérable.

De nombreuses sociétés se trouvent confrontées à des défis pour incorporer l'IA de manière efficace dans leurs stratégies et ne disposent pas toujours des compétences adéquates.

Le MSc Artificial Intelligence for Business a pour objectif de former des experts aptes à concevoir, diriger et déployer des solutions d'IA au sein des entreprises. Les diplômés acquerront les compétences nécessaires pour devenir des leaders dans le domaine de l'IA et offrir à leurs organisations un avantage concurrentiel, grâce à un cursus spécialisé alliant technologie de l'IA, management et cas pratiques.

INFORMATIONS

Today's international markets are characterized by increasing levels of competition, vulnerability, uncertainty, complexity and ambiguity. These trends influence the effectiveness of international business development and consequently business success.

To address these issues, firms are increasingly searching for graduates with expertise in international business development. The MSc International Business Development programme's overarching goal is to train effective business development professionals.

To this end, this Master of Science draws on cutting-edge business development theory and gives students the opportunity to put it into practice by identifying and addressing real-world business opportunities and challenges.

■ Traduction en français

De nos jours, les marchés internationaux se caractérisent par des niveaux croissants de concurrence, de vulnérabilité, d'incertitude, de complexité et d'ambiguïté. Ces tendances influencent l'efficacité du développement commercial international et, par conséquent, le succès commercial. Pour répondre à ces enjeux, les entreprises sont de plus en plus à la recherche de diplômés ayant une expertise en développement des affaires internationales.

L'objectif principal de ce MSc est de former de véritables professionnels au business development.

À cet effet, ce MSc s'appuie sur les théories commerciales ultramodernes, et permet aux étudiants de les mettre en pratique et d'apprendre à les utiliser pour aborder des opportunités et des défis commerciaux de la vie réelle.

- 2-year course: 3-year Bachelor's degree

MSc International Project Development

Neoma Business School

INFORMATIONS

The programme MSc International Project Development, awarding an advanced higher-education degree in international management (DESMI) provides the skills to:

- Perform a functional analysis and implement an action plan that incorporates digital, sustainable and international components
- Conduct a scientific study and issue a recommendation
- Develop ethical leadership abilities to strengthen one's manager posture

The programme is structured around four skill fields. Students work on various projects, from conception to implementation, as well as on business case studies.

They also take part in a simulation game and an online challenge at an international level.

■ Traduction en français

Le programme MSc International Project Development, délivrant un diplôme d'études supérieures spécialisées en management international (DESMI) permet de :

- Réaliser un diagnostic fonctionnel et mettre en œuvre un plan d'actions intégrant les dimensions internationales, digitales et durables.
- Elaborer une étude scientifique et émettre une recommandation
- Développer ses capacités de leader éthique pour renforcer sa posture de manager

Le programme est structuré autour de quatre domaines de compétences. Les étudiants travaillent sur différents projets, de la conception à la mise en œuvre, ainsi que sur des études de cas concrètes.

OPPORTUNITIES

- Business development executive
- Project manager
- Key account manager
- Export manager
- Area manager

MSc Supply Chain Management

Neoma Business School

INFORMATIONS

Thanks to its inter-disciplinary teaching approach, the MSc Supply Chain Management not only focuses on the core disciplines of supply chain management and related subjects such as strategic purchasing and information systems, but it also puts emphasis on soft skills in order to develop students' professional profile and training.

Choose one the following tracks:

- **The Supply chain track** (logistics and development of supply chain strategies)
- **The Procurement track** (strategic sourcing, international procurement, international commerce and custom)

Traduction en français

Le MSc Supply Chain Management axe son enseignement sur les disciplines de base de la gestion de la chaîne d'approvisionnement et des sujets corrélés, tels que les achats stratégiques et les systèmes d'information. En outre, il met l'accent sur les compétences générales afin de peaufiner le profil et la formation professionnels des étudiants.

Choisissez l'un des parcours suivants :

- Le parcours Supply chain (logistique et développement des stratégies de la chaîne d'approvisionnement)
- La parcours Procurement (sourcing stratégique, approvisionnement international, commerce international et douane)

OPPORTUNITIES

- Demand manager,
- Flow manager,
- Head of procurement,
- Supply chain project lead,
- Logistics director,
- Planning manager, purchasing manager, supply chain manager,
- Supply chain/purchasing/operations consultant

€14,500

RNCP 36262

ADMISSION

- Candidates must hold a 4-year degree in Higher Education (4-year Bachelor Degree, BBA, Master 1, or equivalent). Other profiles may be accepted in derogation from these criteria.
- This programme is also available over 2 years for candidates who hold a 3-year in Higher Education level (3-year Bachelor Degree, BMI, licence, or equivalent).

MSc Supply Chain Management

EM Normandie

INFORMATIONS

In the MSc Supply Chain Management, students are trained in a creative and robust way to respond to recent transformations in the Supply Chain functions. These transformations are technological, digital and socio environmental. They benefit from co-teaching methods with the participation of industry professionals.

Programme highlights

- Courses taught in Le Havre, a leading port town, facilitating collaboration with industry and port stakeholders through challenges, seminars and company visits
- Annual Logistics Forum (networking with professionals, job offers)
- Dual degree: CGE Label and Master's level approved by France's Ministry of Higher Education and Research

Traduction en français

Dans le MSc Supply Chain Management, les étudiants sont formés d'une manière créative et robuste pour répondre aux transformations récentes dans les fonctions de la chaîne d'approvisionnement. Ces transformations sont technologiques, numériques et socio-environnementales. Ils bénéficient des méthodes de co-enseignement avec la participation de professionnels de l'industrie.

Points forts de ce programme

- Un programme dispensé au Havre, ville portuaire de premier plan, facilitant la collaboration avec l'industrie et les acteurs portuaires par le biais de défis, de séminaires et de visites d'entreprises.
- Forum annuel de la logistique (mise en relation avec des professionnels, offres d'emploi).
- Double diplôme : Label CGE et niveau Master approuvé par le Ministère français de l'Enseignement Supérieur et de la Recherche

OPPORTUNITIES

- Logistics project manager
- Purchasing and supply chain manager
- Development manager

Master in Management

EM Normandie

INFORMATIONS

The Master in management prepares future managers with a versatile, agile profile, with a culture of entrepreneurship and with the skills to be able to exercise responsible management. Specifically, it prepares them to achieve the following objectives :

- Design and implement an innovation project to adapt to a changing environment,
- Manage individual and collective performance, including in a multicultural environment,
- Manage performance in financial, budgetary and information system terms,
- Define, deploy and evaluate marketing, sales and communication strategies,
- Manage a profit centre responsibly.

Traduction en français

Le « Programme Grande École » prépare de futurs managers au profil polyvalent, agiles, avec une culture d'entrepreneuriat et dotés des compétences permettant d'exercer un management responsable. Plus précisément, il les prépare à atteindre les objectifs suivants :

- Concevoir et mettre en œuvre un projet d'innovation pour s'adapter à un environnement changeant,
- Gérer les performances individuelles et collectives, y compris dans un environnement multiculturel,
- Gérer la performance en termes financiers, budgétaires et système d'information,
- Définir, déployer et évaluer les stratégies marketing, commerciales et de communication,
- Gérer un centre de profit de façon responsable.

ECONOMICS

In the heart of Europe, Normandy is a hub of dynamic economic activity.

Explore economic theories, public policies, and global market dynamics in a stimulating learning environment, leveraging the expertise and partnerships of our higher education institutions and partner businesses.

Immerse yourself in the study of economic trends and contribute to shaping the future through Normandy's excellence programs.

Master Advanced Applied Economics

Université de Caen

INFORMATIONS

The advanced applied economics course of the Master in Applied Economics is an excellence course which aims to prepare students for jobs requiring a high level of expertise in economics.

Applied, the curriculum focuses on real economic problems in their context, relying heavily on data analysis, econometrics and economic modelling.

Advanced, the program will allow students to gain a critical perspective on modeling concepts and techniques used in economics, to better understand their field of validity, and to propose and test original solutions to the problems studied.

Traduction en français

Le parcours Advanced applied economics du Master économie appliquée est un parcours d'excellence qui vise à préparer les étudiants aux métiers requérant un haut niveau d'expertise en économie.

Appliqué, le programme d'étude est axé sur les problèmes économiques réels pris dans leur contexte, en s'appuyant fortement sur l'analyse des données, l'économétrie et la modélisation économique.

Avancé, le programme permettra aux étudiants d'acquérir un recul critique sur les concepts et techniques de modélisation utilisés en économie, de mieux connaître leur domaine de validité, ainsi que de proposer et tester des solutions originales aux problèmes étudiés.

OPPORTUNITIES

Expert positions, which require both technical and synthesis capacities, in :

- Local or national companies
- Administrations
- Consulting firms
- NGOs

UNIVERSITÉ DE ROUEN

- The "Advanced Applied Economics" program benefits from the support of faculty members from the economic departments of both University of Caen Normandy and University of Rouen Normandy. The entire M1 programme will take place in Caen. Some courses (grouped together over one day) will take place in Rouen from M2 onwards.

LAW AND LETTERS

Normandy, with its rich historical and literary heritage, provides an inspiring setting for studies in law and literature.

Whether you aim for a legal or literary career or plan to pursue further studies in these fields, our English programs offer quality education, drawing on the expertise and resources of our academic and professional partners.

By combining tradition and innovation, Normandy provides a stimulating environment for future lawyers, writers, and thinkers.

Bachelor in Foreign and Regional Languages, Literature and Civilisation (English)

Université de Caen

INFORMATIONS

The department of english studies offers a curriculum that encompasses the different areas of the english language: language, linguistics, literature and civilization of the english-speaking world. The department also has the specificity of offering recognized teaching in Irish studies, as well as a preparation for two professional masters (Master in teaching, education and training and Master in translation). Pre-professionalization is proposed from the first year of the Bachelor. Studies can be taken from an english-speaking partner institution at the end of a Bachelor's or Master's degree. Debates in english, oral practice with english-speaking lecturers, cinema club in english or theater in english are all opportunities for students to become familiar with the english language.

Traduction en français

Le département d'études anglophones propose un cursus qui englobe les différents domaines de l'anglistique : la langue, la linguistique, la littérature et la civilisation du monde anglophone. Le département a de plus la spécificité d'offrir un enseignement reconnu en études irlandaises, ainsi qu'une préparation à deux masters professionnalisants (Master MEEF et Master traduction). La préprofessionnalisation est proposée dès la première année de Licence. Les études peuvent être suivies depuis un établissement anglophone partenaire en fin de Licence ou en Master. Débats en anglais, pratique orale avec des lecteurs anglophones, ciné-club en VO ou encore théâtre en anglais sont autant d'occasions offertes aux étudiants de se familiariser avec la langue anglaise.

OPPORTUNITIES

- The LLCER English training allows students to find professional opportunities in teaching, research, translation, cultural and tourism trades.

- Contracts and torts (French law) (20 hours)
- French administrative law (20 hours)
- contract law in the United Kingdom (10 hours)
- U.S. constitutional law (10 hours)
- Documentary research (5 hours)

FURTHER STUDIES

The degree can usefully prepare law or economic and social administration students for an international Master's degree in public or private law, with or without international mobility.

PRACTICAL INFOS

2-year degree

1 year

€595

ERASMUS
University of Wurzburg

ADMISSION

- Open to all law or economic and social administration students from the 2nd year. English test (B2)

INFORMATIONS

The university degree in Legal english and common law meets the needs of students who wish to broaden their language and legal skills to add to their training in legal english and comparative law. It is complementary to a curriculum that is also exclusively focused on the study of french law in order to train lawyers able to evolve in a context of openness and globalization. It is therefore also an excellent springboard to integrate a master's degree in private or comparative international law.

This course, which is entirely in english, also includes legal english courses:

- A comparative approach with an introduction to the common law systems (USA and UK)
- English and american law courses
- French law courses in english.

Traduction en français

Le DU in Legal English and common law répond au besoin des étudiants soucieux d'élargir leurs compétences linguistiques et juridiques pour ajouter à leur parcours une formation en anglais juridique et en droit comparé. C'est une formation complémentaire à un cursus qui par ailleurs est exclusivement tourné vers l'étude du droit français afin de former des juristes capables d'évoluer dans un contexte d'ouverture et de mondialisation. C'est donc également un excellent tremplin pour intégrer un master de droit international privé ou comparé.

Cette formation entièrement dispensée en anglais comprend outre des cours d'anglais juridique :

- Une approche comparative avec une introduction aux systèmes des pays de common law (USA et Royaume Uni)
- Des cours de droit anglais et américain
- Des cours de droit français en anglais

OPPORTUNITIES

- Business legal expert
- Lawyer
- Legal expert and administrative functions with intergovernmental and diplomatic organizations

MSc Agricultural and Food Data Management

Unilasalle Rouen

INFORMATIONS

The Master of Science «Agricultural & Food Data Management» is at the interface between high technology and agriculture & agri-food. This ranges from the processing of data recovered by connected objects such as drones, satellites, tablets, phones, data on the behavior of actors in a sector, to the management and analysis of massive data for decision support.

By 2020, Big Data will revolutionize the company in management, management, research & development and marketing. The very rapid development of digital technology is leading to the development of a new activity for agriculture and requires new skills. The objective of this diploma is to train Data Scientists for agriculture and agri-food.

Traduction en français

Le Master of Science « Gestion des données agricoles et alimentaires » est à l'interface entre la haute technologie et l'agriculture et l'agroalimentaire. Cela va du traitement des données récupérées par les objets connectés tels que les drones, les satellites, les tablettes, les téléphones, les données sur le comportement des acteurs d'un secteur, à la gestion et l'analyse de données massives pour l'aide à la décision.

D'ici 2020, le Big Data va révolutionner l'entreprise en gestion, gestion, recherche & développement et marketing. Le développement très rapide du numérique conduit au développement d'une nouvelle activité pour l'agriculture et nécessite de nouvelles compétences. L'objectif de ce diplôme est de former des scientifiques des données pour l'agriculture et l'agroalimentaire.

2nd year Master in Renewable Energy and Civil Engineering

Université du Havre

INFORMATIONS

This 2nd year of our master's degree aims at delivering an educational programme, about Renewable Energy & Civil Engineering.

The University of Le Havre Normandy has developed this ambitious programme in order to offer Engineering-Sciences students (in civil engineering, mechanical engineering, physics, etc.) opportunities to work in the growing sector of renewable energy in Europe and worldwide. Participants in the programme will have the opportunity to explore a variety of forms and uses of renewable energy sources and to gain specialised knowledge through a placement in industry (an in-company internship) or in scientific laboratory.

Master associated to Graduate School of Materials and Energy Sciences (GS-MES)

Label of excellence in the fields of materials and energy, the GS-MES complements this initial master's training. GS-MES brings together 5 Norman institutions (Rouen Normandy University, Caen Normandy University, Le Havre Normandy University, INSA Rouen, and ENSI Caen) and relies on the 7 laboratories of LabEX EMC3.

<https://www.labex-emc3-gsmes.fr/en/graduate-school-materials-energy-sciences-gs-mes/>

Traduction en français

Cette 2e année de notre master vise à délivrer un programme éducatif, sur les énergies renouvelables et le génie civil.

L'Université du Havre Normandie a développé cet ambitieux programme afin d'offrir aux étudiants en Ingénierie-Sciences (génie civil, génie mécanique, physique, etc.) des opportunités de travail dans le secteur en pleine croissance des énergies renouvelables en Europe et dans le monde. Les participants au programme auront l'occasion d'explorer une variété de formes et d'utilisations des sources d'énergie renouvelables et d'acquérir des connaissances spécialisées grâce à un stage dans l'industrie (un stage en entreprise) ou dans un laboratoire scientifique.

- Génie environnemental côtier
- Gestion à terre

CAREER

As a graduate of Coastal and Marine Engineering and Management (CoMEM+), you will benefit from a unique exposure and experience in multi-geographical environments. You will understand the interconnectedness of coastal systems and the need for interdisciplinary and international collaboration to contribute to global sustainability.

The 3 different professional paths can lead to different sectors.

WHERE TO PREPARE

**BUILDERS
INGÉNIEURS**
EPRON, CALVADOS

<https://clic.orientation-normandie.fr/pEiQq>

PROGRAMME

- Arctic and maritime civil engineering
- Port and coastal facilities
- Safety analysis
- Corporate responsibility and ethics
- Environmental communication
- Port management
- Zone management

You can choose between three study tracks :

- Future ports and waterways
- Coastal environmental engineering
- Shore management

PRACTICAL INFOS

Master of Science

2 years

Erasmus Mundus, 1st semester in Norway, 5 universities (Norway, France, Spain, Italy)

120 ECTS credits

ADMISSION

- B2 in English.
- You must hold a BSc degree in coastal-, civil-, ocean- or environmental engineering; or BSc degree in marine sciences, earth sciences, oceanography, environmental sciences. The degree should comprise a minimum of 180 ECTS.
- You must have a minimum of 30 ECTS in mathematics/statistics in your BSc degree.

Master in Material Sciences

Science and Characterization of Materials for Sustainable Development

Université de Rouen

PROGRAMME

- Thermodynamics
- Crystallized materials
- Solid physics
- English
- Polymers
- Mechanical properties
- Structures and functional properties
- Characterization

PRACTICAL INFOS

Master's degree

2 years

€400 per year

 120 ECTS credits
 RNCP 38707

ADMISSION

- M1 : Bachelor's degree or equivalent with an endorsement such as Physics, Physics-Chemistry, Engineering Sciences or Science and Technology
- M2 : Holders of an M1 or equivalent in fields such as physics, physics-chemistry, material sciences, materials sciences or nanosciences. engineering students (in parallel with their final year).

INFORMATIONS

The Master 1 provides a foundation of fundamental knowledge in material sciences, on industrial materials and knowledge on multi-scale characterization techniques. The master 2 allows to acquire solid knowledge in experimental and numerical techniques used today in materials science, to deepen those on polymer and metal materials. Students will be made aware of the issues of sustainable development and societal responsibilities. A choice option allows to specialize either in advanced characterization of polymers, or in Nanostructures.

Master associated to Graduate School of Materials and Energy Sciences (GS-MES)

Label of excellence in the fields of materials and energy, the GS-MES complements this initial master's training. GS-MES brings together 5 Norman institutions (Rouen Normandy University, Caen Normandy University, Le Havre Normandy University, INSA Rouen, and ENSI Caen) and relies on the 7 laboratories of LabEX EMC3.

<https://www.labex-emc3-gsmes.fr/en/graduate-school-materials-energy-sciences-gs-mes/>

Traduction en français

Le master 1 apporte un socle de connaissances fondamentales en sciences de la matière, sur les matériaux industriels ainsi que des connaissances sur des techniques de caractérisation multi-échelles. Le master 2 permet d'acquérir des connaissances solides en techniques expérimentales et numériques utilisées aujourd'hui en sciences de matériaux, d'approfondir celles sur les matériaux polymères et métalliques. Les étudiants seront sensibilisés aux enjeux du développement durable et des responsabilités sociétales. Une option à choix permet de se spécialiser soit en caractérisation avancée des polymères, soit en Nanostructures.

SCIENCE AND TECHNOLOGY

Normandy, with its aerospace and space, energy, and digital sectors, is at the forefront of technological innovation.

Whether you're passionate about computer science, engineering, mathematics, life sciences, or any other scientific discipline, Normandy provides an environment conducive to innovation and discovery, drawing on the expertise of our higher education institutions, research laboratories, and leading technology companies.

Join us to explore the frontiers of knowledge and contribute to shaping the future through Normandy's excellence programs.

Master in Sciences and Technology Complex Systems Engineering

ESIGELEC

PROGRAMME

Software engineering and digital transformation :

- Advanced computer science, business analysis, project management, business intelligence, cloud computing, big data, artificial intelligence are some of the subjects that you will cover.

Electronic embedded systems

- Computer science, electronics, systems control, digital systems, embedded software, instrumentation, project management

PRACTICAL INFOS

Master's degree

2 years or 18 months

€12 050 for 3 semesters
€15 450 for 4 semesters

120 ECTS credits

ADMISSION

- 2-year program : 3-year Bachelor's degree in a related field of engineering
- 18-month program : 4-year Bachelor's degree in a related field of engineering

INFORMATIONS

The Complex Systems Engineering specialization trains professionals in the fields of analysis, development, consulting and research, in line with the specialties of each pathway. Both courses prepare graduates for direct entry into the job market, as well as for further doctoral studies.

Some companies may be keen to recruit graduates of the program, not only for their technical and managerial knowledge/skills, but also for their bicultural profile, enabling them, for example, to liaise between research/development teams, and/or customers, and/or suppliers, across the globe.

■ Traduction en français

La Mention Ingénierie des Systèmes complexes forme des professionnels dans les domaines de l'analyse, du développement, du consulting et de la recherche en lien avec les spécialités de chaque parcours. Ces deux parcours préparent aussi bien les diplômés pour une entrée directe sur le marché du travail, que pour une poursuite d'études doctorales.

Certaines entreprises peuvent apprécier de recruter des diplômés de la formation, non seulement pour leurs connaissances/compétences techniques et managériales, mais aussi pour leur profil biculturel, permettant par exemple de faire le lien entre des équipes de recherche/développement, et/ou des clients, et/ou des fournisseurs, à travers le monde.

OPPORTUNITIES

Software engineering and digital transformation

- Software system design engineer
- Maintenance engineer
- Software developer
- Project manager...

Electronic embedded systems

- Embedded systems engineer
- Design engineer
- Project manager
- Communications engineer...

Master in Physics (Nuclei, atoms and collisions)

Université de Caen

INFORMATIONS

The Master's degree in Nuclei, Atoms, Collisions is part of the Erasmus+ Joint Master Degree in Nuclear Physics. This master's degree also includes the Graduate School «Normandy Nuclear Physics», which is an excellency project financed by the Normandy Region. It provides a solid training in the field of nuclear and atomic collision physics, which corresponds to the recognized expertise of Normandy research laboratories.

Master associated to Graduate School of Normandy Nuclear Physics (N2P)

Students can candidate to this Graduate school. The N2P Graduate School offers top-level training in nuclear physics and aims to support students in the realization of their scientific and professional projects in the various specialties of the field (theoretical physics, experimental physics or industrial applications).

<https://graduateschool-n2p.unicaen.fr/>

Traduction en français

Le Master Noyaux, Atomes, Collisions fait partie du Joint Master Degree Erasmus+ Nucphys sur la physique nucléaire. Ce master comprend la Graduate School «Normandy Nuclear Physics», un projet d'excellence financé par la Région Normandie. Le Master offre une formation solide dans le domaine de la physique subatomique et de la physique des collisions, qui correspondent à l'expertise reconnue des laboratoires de recherche normands.

OPPORTUNITIES

- Research and development
- Project manager
- Application and research engineer
- Doctoral research contract
- Higher education
- University research
- **Medical** : radiotherapy, hadrontherapy
- **Civil nuclear applications** : energy, instrumentation, big data, simulations

WHERE TO PREPARE

**UNIVERSITÉ
DE CAEN**
CAEN, CALVADOS

- B2 certification
- In Master 1: On file + interview.
After 3 years in physics
- In Master 2: On file + interview.
After M1 in physics

Master SpaceMed

Physiology and medicine of humans in space and extreme environments

Université de Caen

PROGRAMME

- Physiology
- Ethics
- Study models
- Signal analysis statistics
- Advanced methods and practises
- Internship
- Thesis

STRENGTHS

- The small class size and close interaction with the teaching staff.
- Science teaching and training with innovative and interdisciplinary methodologies.
- Research projects (laboratory and field studies) involving experimental work, data analysis and interpretation.
- Workshops bringing together students, academics and industry professionals.

PRACTICAL INFOS

Master's degree

2 years

 Erasmus Mundus 3 universities
(Germany, Slovenia, France)
Semester 1 in Caen, Semester 2 in
Berlin, Semester 3 in Ljubljana.

120 ECTS credits

ADMISSION

- Either a Bachelor's degree in natural sciences or kinesiology (180 ECTS), a Master degree in engineering, or a medical degree.
- A minimum level of English language proficiency equivalent to B2 according to the levels defined by the Common European Framework of Reference for languages (CEFR).

INFORMATIONS

SpaceMed is a 2-year full-time European Master's programme offering a unique integrated inter- and multidisciplinary study on the effects of extreme environments, particularly space flight, on humans. The curriculum places an emphasis on hands-on activities in state-of-the-art laboratories and on field studies, including space flight analogues, and extreme environments.

Traduction en français

SpaceMed est un programme de master européen à temps plein de 2 ans offrant une étude inter- et multidisciplinaire intégrée unique sur les effets des environnements extrêmes, en particulier les vols spatiaux, sur les humains. Le programme met l'accent sur les activités pratiques dans les laboratoires de pointe et sur les études sur le terrain, y compris les analogues des vols spatiaux et les environnements extrêmes.

OPPORTUNITIES

The objective of the SpaceMed Master's degree is to provide training for those interested in pursuing a research career in space life sciences and extreme environments, as well as for medical doctors who would be able to offer medical support for future commercial space flights. The course will also provide valuable training to biomedical engineers who will be able to design, optimise, operate, and validate aerospace life support devices.

Master in Data Sciences (SD)

Université de Rouen

INFORMATIONS

The Master SD is awarded by the University of Rouen Normandy (URN) and INSA Rouen Normandy (INSARN) as part of a co-accreditation agreement. The courses are taught at URN's UFR de Sciences et Techniques and at INSARN, on the Madrillet campus in Saint-Étienne du Rouvray. It lies at the interface between computer science, mathematics and mobile and embedded technologies. Its aim is to train high-level executives capable of designing, producing and deploying infrastructures and systems responsible for collecting, storing, analysing and interpreting a variety of data intelligently, with a view to generating appropriate responses in heterogeneous and changing application contexts.

Master associated to Graduate School in Mathematics and Computer Science (MINMACS)

This Master is part of the MINMACS graduate school, a joint graduate school of the mathematics and information sciences departments of the three major universities (Caen, Le Havre and Rouen) and Grandes Ecoles (ENSICAen and INSA Rouen) in Normandy.

<https://www.minmacs.fr/en/>

Traduction en français

Le Master SD est un Master délivré par l'Université de Rouen Normandie (URN) et l'INSA de Rouen Normandie (INSARN) dans le cadre d'une co-accréditation. Les enseignements sont dispensés à l'UFR de Sciences et Techniques de l'URN et à l'INSARN, sur le campus du Madrillet à Saint-Étienne du Rouvray.

Il se situe à l'interface de l'informatique, des mathématiques et des technologies mobiles et embarquées. Il vise la formation de cadres de haut niveau capables de concevoir, de réaliser et de déployer des infrastructures et des systèmes chargés de collecter, de stocker, d'analyser, et d'interpréter des données variées de façon intelligente, pour éventuellement générer des réponses appropriées dans des contextes applicatifs hétérogènes et évolutifs.

WHERE TO PREPARE

UNIVERSITÉ DE ROUEN

ROUEN, SEINE-MARITIME

<https://clic.orientation-normandie.fr/69pN1>

PROGRAMME

The SD master's program offers three tracks :

DATA SCIENCE (SD)

Opportunities : engineer, consultant or data scientists, for different activity sectors: software edition, web services and e-business, public services, automobile, high-tech industry, or biomedical area. All courses are taught in English.

INTELLIGENT, MOBILE AND EMBEDDED SYSTEMS (SIME)

Opportunities : engineer with a specialization in mobile and embedded computer science, able to manage software and hardware projects for different activity sectors: security, communication, automation and control, robotics, home automation, aeronautics industry, transport, etc. All courses are taught in French.

MINMACS (Graduate School)

High-level training in mathematics and information science, with applications in the fields of health, mobility and renewable energy.

PRACTICAL INFOS

Master's degree

2 years

€400 per year

120 ECTS credits
RNCP 35392

ADMISSION

- Bachelor's degree in computer science, mathematics, EEEA or equivalent.
- Admission to the first year (M1) is granted after examination of an application.

Master of Chemistry XL-Chem

Université de Caen

Université de Rouen

Université du Havre

ENSICAEN

INSA Rouen

PROGRAMME

Possibility for XL-Chem students to build-up their own curriculum associated to their own professional project by selecting "à la carte" core scientific course in chemistry amongst those existing in the Norman Master curricula:

- Master of organic chemistry for living (COMV)
- Master of chemistry polymers and surfaces (PS)
- Master of chemistry analysis and spectrochemistry (AS)
- Master of chemistry aroma, perfumes and cosmetics (ARPAC)

Tutorship and coaching of each XL-Chem student with a research project in a laboratory managed by academics of Normandy University (30 ECTS).

Certificated formation in management given by a Business school (30 ECTS).

6 month research Internship in Industry or in an university of one of the international partners of XLChem.

PRACTICAL INFOS

5-year degree

2 years

3 major universities (Caen, Le Havre and Rouen) and Grandes Ecoles (ENSICAEN and INSA Rouen)

120 ECTS credits

ADMISSION

- Bachelor's degree in chemistry. Application through the XL-Chem portal then to all 3 Norman universities.

INFORMATIONS

The XL-Chem Graduate School of Research in chemistry is made up of all the units of medical, molecular and macromolecular chemistry on the Norman territory, which is the second most important area of medicine production in Europe. One of the objectives is training daring chemists capable of seizing opportunities as well as learning modern management concepts and tools, such as Agility, Reactivity, Innovation, Adaptability to change. The specificity of the Chemistry Master's Degree of the XL-Chem Graduate School of Research allows students to pick the scientific courses they wish to take from a portfolio of courses in English in all the Master's courses in Chemistry at the 3 universities in Normandy and the engineering schools.

Traduction en français

La XL-Chem Graduate School of Research en chimie est composée de toutes les unités de chimie médicale, moléculaire et macromoléculaire sur le territoire normand, qui est le deuxième plus important domaine de production de médecine en Europe. L'un des objectifs est de former des chimistes audacieux capables de saisir les opportunités ainsi que d'apprendre des concepts et des outils de gestion modernes, tels que l'agilité, la réactivité, l'innovation, l'adaptabilité au changement. La spécificité du Master Chimie de l'Ecole doctorale de recherche XL-Chem permet aux étudiants de choisir leurs cours scientifiques parmi un portefeuille de cours en anglais dans tous les parcours de master de chimie des 3 universités normandes et des écoles d'ingénieurs.

OPPORTUNITIES

- Future managers in the health
- Cosmetics
- Speciality chemical industry and sustainable development fields
- Research engineers
- Quality engineers...
